FINANCE

SPECIAL COMMITTEE ON AGING

December 23, 2024

The Honorable Lina Khan Chair Federal Trade Commission 600 Pennsylvania Avenue NW Washington, D.C. 20580

## Chair Khan,

I write regarding Cardinal Health's \$3.9 billion proposed acquisition of a majority (71%)<sup>1</sup> stake in GI Alliance, the country's largest gastroenterology management services organization (MSO)<sup>2</sup> which oversees over 900 physicians across 345 office locations in 20 states.<sup>3</sup> This deal threatens to limit competition by expanding Cardinal Health's control of physician practices, while giving Cardinal an incentive to restrict those practices from contracting with Cardinal's rival wholesalers.

Cardinal controls 28% of the drug wholesale market, joining McKesson and Cencora as one of the three biggest wholesalers in the country, with a combined 98% market share.<sup>4</sup> Leveraging this dominant market power, Cardinal has consistently locked its customers into restrictive contracts,<sup>5</sup>

blocked out rival wholesalers,<sup>6</sup> and squeezed generic drug manufacturers,<sup>7</sup> leading to more frequent drug shortages,<sup>8</sup> higher drug costs,<sup>9</sup> and poorer health outcomes.<sup>10</sup> In addition to dominating the wholesaler market, Cardinal has leveraged its profits to pursue an aggressive vertical acquisition strategy, including acquiring a Group Purchasing Organization (GPO), a data analytics firm, medical device lines, specialty pharmacies, and physician practices.<sup>11</sup> These acquisitions are part of a broader trend of vertically integrated health care conglomerates operating as both seller and buyer of prescription drug services.<sup>12</sup>

In October, I wrote to you regarding my concerns with wholesalers pursuing further vertical acquisitions of physician practices. <sup>13</sup> Specifically, I wrote to urge FTC to closely scrutinize Cardinal's acquisition of Integrated Oncology Network (ION), an MSO that oversees over 50 physician practices spanning 10 states. <sup>14</sup> By acquiring ION, Cardinal would be able to force its affiliated practices to enter into sole-source or prime vendor agreements, which would "lock them in as customers" and effectively block competing wholesalers from offering their services, while also introducing irreparable conflicts of interest that could raise drug costs for patients and taxpayers. <sup>15</sup> The FTC did not act, and the acquisition was completed on December 3, 2024. <sup>16</sup>

16 Cardinal Health, "Cardinal Health completes acquisition of Integrated Oncology Network", December 3, 2024, 

https://newsroom.cardinalhealth.com/2024-12-03-Cardinal-Health-completes-acquisition-of-Integrated-Oncology-Network.

Now, an even bigger Cardinal is following the same playbook, looking to expand its control of the dwindling gastroenterologist market<sup>17</sup> with its acquisition of GI Alliance, the largest gastroenterology MSO in the country. In addition to the concerns I outlined in my October letter, the acquisition of GI alliance introduces further opportunities for self-dealing, as Cardinal serves as the primary supplier of pharmaceutical products for Gastrologix GPO — the only gastroenterology-focused GPO in the nation.<sup>18</sup>

Accordingly, I urge FTC to closely scrutinize this deal, including under Section 7 of the Clayton Act, which prohibits any acquisition that may substantially lessen competition or tend to create a monopoly. <sup>19</sup> If FTC determines this deal violates antitrust law, including to the detriment of patients seeking medical treatment, FTC should challenge this acquisition.

Sincerely,

Elizabeth Warren
